DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a semiconductor device, classified in class 257, subclass 382.
 - II. Claims 14-20, drawn to a process of making a semiconductor device, classified in class 438, subclass 533.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, in the process claim 14, instead of first forming word line patterns and a gate pattern and then forming word line spacers on the sidewalls of the word line patterns and gate spacers on the sidewalls of the gate pattern, the alternative method can be made by first forming word line spacers and gate spacers on the sidewalls of the temporary masks and then depositing the word line patterns and the gate pattern between the spacers after removing the temporary masks.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2814

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
